

Child Focused 2020

It's the new year, and of course everyone is talking about ways to improve your lives in 2020! I am sure we all have many areas that we want to focus on and improve in the new year. But, don't just focus on yourself. Focus on your young child.

Children develop at an astounding rate. 90% of a child's brain growth happens before he or she starts kindergarten! Furthermore, at least one million new neural connections are made every second! With statistics like that, it is obvious that we need to be intervening early to make sure our children are on the right path. So, if you think your child may be a little behind developmentally, may have some speech impairments, behavior problems, social-emotional issues, or more, then consider intervening and getting some assistance. Your child is developing so quickly that "waiting to see what happens" can be detrimental to a child in the long run.

As adults we can put off our resolutions for another year, but our kids can't. Make 2020 the year you make a difference in your child's life. They need you to make the call, to take steps to lay a foundation for a bright future.

If you are not sure where to get assistance, give Teleplay Therapy a call at 919-480-8589. Our experts can help your child with developmental milestones.
